

**Amendments to the Claims:**

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1-14. (Canceled).

15. (Currently Amended) An electroluminescent device, comprising:

a bank defining a ~~pixel~~; plurality of pixels, each of the pixels having at least:

\_\_\_\_\_ a TFT device,

\_\_\_\_\_ ~~an anode provided for the pixel~~; an anode,

\_\_\_\_\_ a light-emitting layer provided ~~in the pixel and~~ above the ~~anode and~~  
~~including at least an organic polymer~~; anode,

\_\_\_\_\_ a thin-film layer provided above the light-emitting layer, ~~the thin-film~~  
~~layer being continuously formed so as to cover a plurality of pixels~~; and

\_\_\_\_\_ a cathode provided above the thin-film layer,

\_\_\_\_\_ the thin-film layer being continuously formed so as to cover the plurality of  
pixels, and

\_\_\_\_\_ the cathode being continuously formed so as to cover the plurality of the  
pixels.

16. (Canceled).

17. (Previously Presented) The electroluminescent device according to claim 15,  
the thin-film layer suppressing current flowing through the light-emitting layer and not  
contributing to light emission.

18. (Canceled).

19. (Previously Presented) The electroluminescent device according to claim 15,  
the bank overlapping edges of the anode.

20. (Original) The electroluminescent device according to claim 15, further comprising:

a hole injection layer having electrical conductivity, the thickness thereof being not less than 100 nm, disposed between the light-emitting layer and the anode.

21. (Original) The electroluminescent device according to claim 15, further comprising:

a buffer layer having electrical conductivity, the thickness thereof being not less than 100 nm, disposed between the light-emitting layer and the anode.

22. (Currently Amended) The electroluminescent device according to claim 15, ~~the further comprising an~~ organic polymer including at least one of polyfluorene and a derivative of polyfluorene.

23. (Currently Amended) The electroluminescent device according to claim 15, ~~the further comprising an~~ organic polymer including at least one of poly(p-phenylenevinylene) and a derivative of poly(p-phenylenevinylene).

24. (Currently Amended) The electroluminescent device according to claim 15, ~~the further comprising a~~ degree of polymerization ~~of the of an~~ organic polymer being at least two.

25. (Original) The electroluminescent device according to claim 15, the light-emitting layer being formed by depositing a plurality of light-emitting material layers.

26. (Currently Amended) ~~The electroluminescent~~ An electronic device having the electroluminescent device according to ~~claim 15, the light-emitting layer including the organic polymer being formed by a printing method.~~ claim 15.

27-42. (Canceled).
